justintagarda@gmail.com (+63) 927-380-0613 Remote (UTC+8) • Cagayan de Oro City, Philippines
https://www.linkedin.com/in/justintagarda github.com/JustinTagarda

Portfolio: published apps, production systems, and project case studies

PROFESSIONAL SUMMARY

Senior .NET backend and full-stack developer experienced in modernizing business-critical systems, production APIs, SQL-backed workflows, customer portals, and released products. Hands-on across system design, deployment, troubleshooting, and long-term support.

WORK EXPERIENCE

Backend Developer - ASP.NET Framework & SQL Server

Drizzio / Digital Entrepreneur LLC - USA (Remote)

Nov 2024 - Jan 2026

- Delivered a Twilio communications dashboard with visual SMS and email status reporting for support, operations, and company leadership.
- Led the end-to-end migration of production websites, services, and databases - including the primary website and SQL Server environment - from Windows Server 2022 to Windows Server 2025.
- Improved .NET backend services and frontend data bindings for production workflows.
- Configured IIS, SQL Server, and dependent services for the new environment, supporting the migration and production cutover.
- Monitored production infrastructure and provided incident support during service downtime.
- Completed the production cutover and retired legacy servers from active use.

Freelance Software Developer

Independent

2021 - Present (Active)

- Built and shipped web, desktop, and cross-platform products, including applications published on the Microsoft Store and Google Play.
- Delivered React, Next.js, and TypeScript interfaces integrated with .NET REST APIs, authentication flows, dashboards, and data-driven workflows.
- Partnered directly with clients to define scope and deliver maintainable production software.

IT Manager

GEDAC Electric Company - Jeddah, Saudi Arabia

2015 - 2020

- Promoted to IT Manager to supervise IT staff responsible for hardware, network maintenance, and employee technical support.
- Owned monitoring, maintenance, and downtime support for company-wide applications and infrastructure across the head office, Saudi regional branches, and international sales offices.
- Established and administered SQL Server, IIS, file-sharing services, virtual machines, and network services used across departments.

.NET Developer / System Administrator

GEDAC Electric Company - Jeddah, Saudi Arabia

2007 - 2015

- Solely designed and developed C#/.NET Framework WinForms applications for inventory, projects, engineering, procurement, sales, operations, and management reporting across company locations.
- Modernized the legacy DOS-based inventory system into a customized Windows application and decommissioned the former platform.
- Built gedac.com and an ASP.NET Web Forms customer portal for project-status inquiries, messaging, feedback, and document sharing.

Computer Programmer

Al Salem Kitchen Company - Jeddah, Saudi Arabia

1999 - 2006

- Developed a company-wide Microsoft Access inventory management system to improve tracking and internal processes.
- Supported internal software, LAN infrastructure, and technical troubleshooting across offices, factories, and warehouses.
