PROFESSIONAL SUMMARY

Senior .NET developer experienced in production APIs, SQL-backed business systems, and modern React/Next.js interfaces. Built and maintained .NET APIs used by thousands of daily users, alongside internal systems, ERP workflows, and customer portals. Experienced in turning business requirements into maintainable software, with hands-on ownership across development, deployment, troubleshooting, and support.

WORK EXPERIENCE

Backend Developer - ASP.NET Framework & SQL Server

Drizzio / Digital Entrepreneur LLC - USA (Remote)

Nov 2024 - Jan 2026

- Developed and maintained .NET backend APIs for production systems used by thousands of daily users.
- Translated business requirements into maintainable backend features with a distributed development team.
- Supported SQL Server performance monitoring, backups, troubleshooting, and ongoing database maintenance.
- Contributed client-side functionality in the existing Knockout.js and jQuery application stack.
- Supported IIS deployments, server monitoring, and production issue resolution.

Freelance Software Developer

Independent

2021 - Present (Active)

- Built and shipped web, desktop, and cross-platform applications, including products published on the Microsoft Store and Google Play.
- Built responsive React, Next.js, and TypeScript interfaces integrated with .NET REST APIs.
- Implemented API integrations, authentication flows, dashboards, and data-driven business workflows.
- Worked directly with clients to define scope, refine functionality, and deliver maintainable production software.

.NET Developer / System Administrator

GEDAC Electric Company - Jeddah, Saudi Arabia

2007 - 2020

- Built and maintained the company website, ERP applications, and inventory systems used to support daily operations and data accuracy.
- Developed a customer portal for real-time project tracking and internal tools used by branch offices for daily workflows.
- Designed, deployed, and maintained business-critical applications supporting cross-department operations.
- Combined software delivery with IT operations to maintain system reliability, infrastructure stability, and responsive technical support.

Computer Programmer

Al Salem Kitchen Company - Jeddah, Saudi Arabia

1999 - 2006

- Developed a company-wide inventory management system in Microsoft Access to improve tracking and internal processes.
- Maintained internal software tools supporting daily operations and reporting.
- Supported LAN infrastructure across offices, factories, and warehouses.
- Provided systems, hardware, and network troubleshooting across departments.

SKILLS

Core capabilities for backend systems, SQL-backed business workflows, modern frontend interfaces, deployment, and production support.

Backend

- ASP.NET Core • .NET • C# • REST APIs • ASP.NET Framework
- Entity Framework Core

Frontend

- TypeScript • React • Next.js • JavaScript • Tailwind CSS • HTML
- CSS

Databases

- SQL Server • PostgreSQL • Supabase • NoSQL • MySQL

Additional Experience

- WPF • Windows Forms • Microsoft Access

Business Systems

- Internal Tools • Admin Portals • Custom Dashboards
- Workflow Automation • Reporting Interfaces

Testing & Quality

- xUnit • Automated Regression Testing • Build/Test Validation

DevOps & Infrastructure

- Docker • IIS • Azure DevOps • CI/CD Pipeline Practices

EDUCATION

BS Commerce major in Accounting

Xavier University College - Cagayan de Oro City, Philippines

COBOL Programming Certificate

Systems Technology Institute - Cagayan de Oro City, Philippines
